ARAID 2200 FIRMWARE UPDATE

ARAID 2200 is composed of two major CPUs (Dual CPU design). Each CPU comes with its own firmware respectively.

The 1st CPU is **R.E.C.** (**Raid Engine Cpu**). The CPU may be referred as **(Sil)5744**.

> ### Please follow the instructions to update the Firmware for R.E.C.
>> • Prepare the proper version firmware file for R.E.C.
>> • Connect ARAID with either **SATA** or **e-SATA** or **USB** cable.
>> • Launch **SteelVine Manager** utility to upgrade.

The 2nd CPU is **H.I.C.** (**Human Interface Cpu**). The CPU may be referred as **(LPC)2103**.

> ### Please follow the instructions to upgrade the Firmware for H.I.C.
>> • A **hardware jumper J4** (located at the lower right corner of the rear panel of ARAID) must be set to "**CLOSE**".
>> • Prepare the proper version firmware file for H.I.C.
>> • Connect the ARAID's RS-232 port to your PC by either
>>> (a) **Traditional RS-232** connector/cable
>>> (b) **USB type 9-pin** connector/cable with **proper driver installed**
>> • Launch **Flash Magic utility** to upgrade.
>> • After upgrade completed, "**OPEN**" remove the jumper J4 for ordinary operation.
